Allowance

1. Claims 13-45 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art references most closely resembling the Applicant's claimed invention are Fujino et al (U.S. 5,651,006) and Fisher et al (U.S. 6,571,286).

First, Fujino disclosed a hierarchical communication network management system is structured by a plurality of agents and sub-managers connected to lower communication networks and an integration manager connected to a higher communication network. However Fujino failed to disclose indicator agents & synthesis agents a sharing the same structure; The modification of the association between synthesis & indicator agents based on a predetermined maximum number of resources in a subdomain. Applicants arguments were persuasive and over come the prior art These limitations are incorporated into all of the independent claims (claims 13,33).

Second, Fischer did disclose a method for enhancing communications efficiency that defines pools of network resources. A Parameter assignment classification is provided to enable the assignment of a resource. However Fischer rules did not indicator agents & synthesis agents a sharing the same structure; The modification of the association between synthesis & indicator agents based on a predetermined maximum number of resources in a subdomain. Applicants arguments were persuasive and over come the prior art

Art Unit: 2145

In summary, the Examiner submits that there is no motivation to combine the aforementioned references; therefore claims (13,33) have been deemed allowable over the prior art.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
